

MASTER BODY

Fire Departments are becoming increasingly aware of the importance in providing coverage to I-Zone areas. These regions are often impossible for standard Type-1 municipal apparatus to reach.

The mission becomes two-fold:

1. Purchase an apparatus that provides first response and structure protection.
2. The unit must possess the ability to carry the troops into unstable terrain, with the confidence and gear to complete the mission.

Enter the new **Multi-Tack IZ19** from *Master Body*, the premier builder of Wildland/Urban interface fire apparatus. A new apparatus that's right at home, fighting and providing protection in municipal situations, and confident enough to take the battle into the Wildland. The **Multi-Tack IZ19** is ready to take on any challenge.

Shortest Wheelbase: 150" for excellent maneuverability the standard is 162".

Low Center of Gravity: Integral tank providing an efficient operating envelope on a side slope.

600 - Gallon Water Tank: Spring mounted integral water tank allows for a short wheelbase & low center of gravity while still providing an NFPA rated hose bed.

1250 GPM Two Stage Pump System: Provides an NFPA compliant pump rating.

Auxiliary Pump Option: That gives excellent pump & roll capability for mobile attack.

Compartmentation: Over **135 cubic feet** of compartment space with large door openings, including a transverse compartment for stokes and backboard storage.

Ladder Storage: The Zico Quick-Lift over the top horizontal ladder access system allows preservation of valuable compartment space. Rack supports NFPA compliant ladder complement.

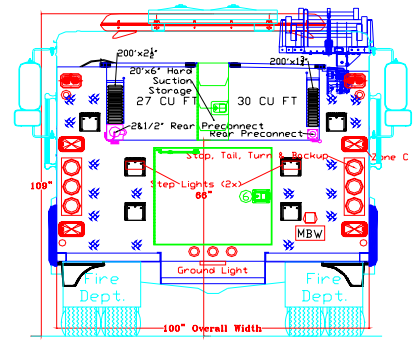

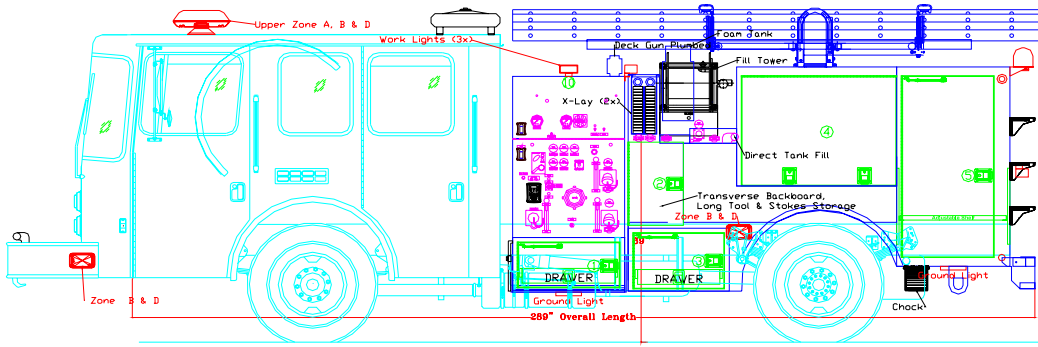

Class A Foam System: Standard FoamPro 2001 class A foam system specifically engineered for wildland/I-Zone urban interface apparatus.

**When making a decision to purchase an Urban/Interface apparatus... Make the call!
Build your fleet with quality...build it *MASTERfully!!!***

STANDARD FEATURES

- ◆ 4 door HME 1871 cab/chassis
- ◆ Cummins 400 HP engine
- ◆ Allison EVS3000 transmission
- ◆ 162" wheel base
- ◆ 1250 GPM two stage pump
- ◆ 650 gallon stainless steel integrated water tank
- ◆ FoamPro 2001 class A foam system
- ◆ 20 gallon integrated foam tank
- ◆ 39 cubic feet of hose bed space
- ◆ Over 145 cubic feet of compartment space
- ◆ Booster reel
- ◆ NFPA LED lighting package
- ◆ Dual cross-lay for 200 feet of 1 3/4" hose each
- ◆ Dual Front pre-connect for 50' of 1 3/4" hose each
- ◆ Rear pre-connect for 200' of 1 3/4" hose
- ◆ Rear pre-connect for 200' of 2 1/2" hose
- ◆ 4 each SCBA bottle storage

OPTIONAL ITEMS

- ◆ Larger cabs and 4 x 4
- ◆ Different power plant options
- ◆ Many pump options
- ◆ Auxiliary pump for mobile pumping
- ◆ Up to 800 gallon water tank
- ◆ Dual foam systems class A/B
- ◆ Larger foam tank
- ◆ Compressed air foam system—CAFS
- ◆ Remote monitors
- ◆ Generator or 110V power options
- ◆ Scene light options
- ◆ SCBA seats
- ◆ Medical gear storage in cab
- ◆ Emergency lighting
- ◆ Many plumbing options
- ◆ Many body options
