

MASTER BODY

The **MASTER-TACK** is the latest addition from the premier builders of Wildland/Urban Interface fire apparatus. The **MASTER-TACK** can be matched with a Ford, Chevrolet or Dodge chassis with a 550/5500 capability to meet your fleet compatibility. The spring-mounted body incorporates a 300/15 gallon integrated stainless steel water/foam tank, a Waterous E511-A pump, and a Foam-Pro 1600 foam system. This apparatus is engineered intelligently! We've packed this unit full of deep compartmentation, a spacious hose bed, stokes/back board storage with room to store the gear and tools you need to get the job done! This unit is built for rescue in the winter and wild land in the summer. All built with the quality you've come to expect from Master Body!

Shortest Wheelbase: 140" - 176" for excellent maneuverability.

Low Center of Gravity: Operating envelope of up to 34° on a side slope.

Height: 88" tall with the standard light bar and can be even lower. Great for parking structures.

Stokes/Back Board Storage: Has a designated area for the stokes which makes this a perfect everyday squad.

250 - 400 gallon Water Tank: Spring mounted integral water tank allows for a short wheelbase & low center of gravity, while providing more water capacity and offering increased space for gear.

Pump System: Waterous E511-A pump system. Ideal for pump and roll and structural firefighting capability. Waterous fire pumps provide versatility for a variety of situation demands.

Compartmentation: Over 100 cubic feet of compartment space with large door openings, and the depth to store a variety of difficult sized gear.

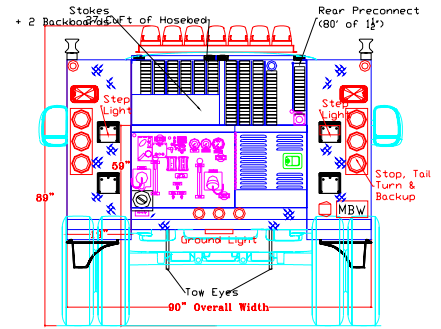

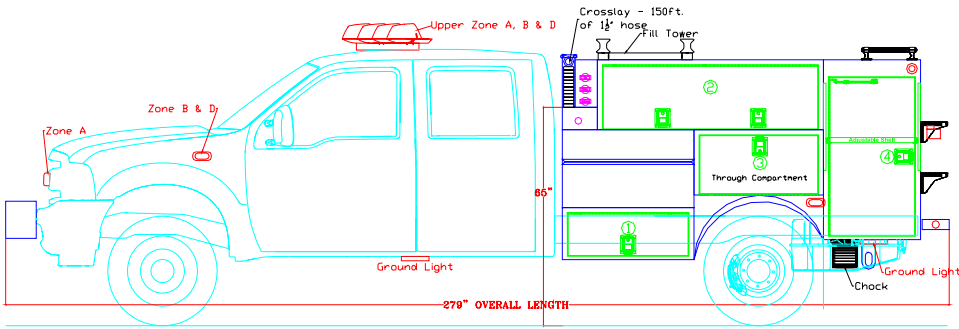

Class A Foam System: Standard FoamPro 1600 class A foam system, specifically engineered for wildland/urban interface apparatus.

**When making a decision to purchase an Urban/Interface apparatus... Make the call!
Build your fleet with quality...build it *MASTERfully!!!***
